Digital technology has transformed cinema’s production, distribution, and consumption patterns and pushed contemporary cinema toward increasingly global markets. In the case of Japanese cinema, a once moribund industry has been revitalized as regional genres such as anime and Japanese horror now challenge Hollywood’s preeminence in global cinema. In her rigorous investigations of J-horror, personal documentary, anime, and ethnic cinema, Mitsuyo Wada-Marciano deliberates on the role of the transnational in bringing to the mainstream what were formerly marginal B-movie genres. She argues persuasively that convergence culture, which these films represent, constitutes Japan’s response to the variegated flows of global economics and culture. With its timely analysis of new modes of production emerging from the struggles of Japanese filmmakers and animators to finance and market their work in a post-studio era, this book holds critical implications for the future of other national cinemas fighting to remain viable in a global marketplace. As academics in film and media studies prepare a wholesale shift toward a transnational perspective of film, Wada-Marciano cautions against jettisoning the entire national cinema paradigm. Discussing the technological advances and the new cinematic flows of consumption, she demonstrates that while contemporary Japanese film, on the one hand, expresses the transnational as an object of desire (i.e., a form of total cosmopolitanism), on the other hand, that desire is indeed inseparable from Japan’s national identity. Drawing on a substantial number of interviews with auteur directors such as Kore’eda Hirokazu, Kurosawa Kiyoshi, and Kawase Naomi, and incisive analysis of select film texts, this compelling, original work challenges the presumption that Hollywood is the only authentically “global” cinema.

Cult Cinema: an Introduction presents the first in-depth academic examination of all aspects of the field of cult cinema, including audiences, genres, and theoretical perspectives. Represents the first exhaustive introduction to cult cinema Offers a scholarly treatment of a hotly contested topic at the center of current academic debate Covers audience reactions, aesthetics, genres, theories of cult cinema, as well as historical insights into the topic

Since the end of the Second World War—and particularly over the last decade—Japanese science fiction has strongly influenced global popular culture. Unlike American and British science fiction, its most popular examples have been visual—from Gojira (Godzilla) and Astro Boy in the 1950s and 1960s to the anime masterpieces Akira and Ghost in the Shell of the 1980s and 1990s—while little attention has been
paid to a vibrant tradition of prose science fiction in Japan. Robot Ghosts and Wired Dreams remedies this neglect with a rich exploration of
the genre that connects prose science fiction to contemporary anime. Bringing together Western scholars and leading Japanese critics, this
groundbreaking work traces the beginnings, evolution, and future direction of science fiction in Japan, its major schools and authors,
cultural origins and relationship to its Western counterparts, the role of the genre in the formation of Japan's national and political identity,
and its unique fan culture. Covering a remarkable range of texts—from the 1930s fantastic detective fiction of Yumeno Kyûsaku to the cross-
culturally produced and marketed film and video game franchise Final Fantasy—this book firmly establishes Japanese science fiction as a vital
and exciting genre. Contributors: Hiroki Azuma; Hiroko Chiba, DePauw U; Naoki Chiba; William O. Gardner, Swarthmore College; Mari

Japanese animation has been given fulsome academic commentary in recent years. However, there is arguably a need for a more
philosophically consistent and theoretically integrated engagement. While this book covers the key thinkers of contemporary aesthetic
theory, it aims to reground reflection on anime within the aesthetics of R.G. Collingwood.

>Traditional Monster Imagery in Manga, Anime and Japanese Cinema builds on the earlier volume Anime and its Roots in Early Japanese
Monster Art, that aimed to position contemporary Japanese animation within a wider art historical context by tracing the development of
monster representations in Edo- and Meiji-period art works and post-war visual media. While the previous volume concentrated on modern
media representations, this work focuses on how Western art historical concepts and methodology might be adapted when considering non-
Western works, introducing traditional monster art in more detail, while also maintaining its links to post-war animation, sequential art and
Japanese cinema. The book aims at a general readership interested in Japanese art and media as well as graduate students who might be
searching for a research model within the fields of Animation Studies, Media Studies or Visual Communication Design.

Compelling and accessible, THE POWER OF ART features gorgeous images and themes that connect with today's students and an engaging
writing style that's praised by instructors and students alike. The revised third edition delivers a brief yet comprehensive survey which
demonstrates that art is everywhere and relevant to all students. The text incorporates global material, reflecting cultural intersections and
mutual influences--and Art News boxes present real events, connecting art to students' lives. In addition to excellent art history coverage,
THE POWER OF ART features a diverse mix of artists and spotlights current trends in artistic mediums and themes. Important Notice: Media

This comprehensive history of Japanese animation draws on Japanese primary sources and testimony from industry professionals to explore
the production and reception of anime, from its early faltering steps, to the international successes of Spirited Away and Pokémon.
This book constitutes the refereed proceedings of the 5th International Conference on E-learning and Games, Edutainment 2010, held in Changchun, China, in August 2010. The 60 revised full papers presented were carefully reviewed and selected from 222 submissions. The papers are organized in topical sections on E-learning tools and platforms; E-learning system for education; E-learning environments and applications; game techniques for edutainment; multimedia techniques for edutainment; and computer animation and graphics for edutainment.

For over a century, movies have played an important role in our lives, entertaining us, often provoking conversation and debate. Now, with the rise of digital cinema, audiences often encounter movies outside the theater and even outside the home. Traditional distribution models are challenged by new media entrepreneurs and independent film makers, user generated video, film blogs, mashups, downloads, and other expanding networks. Reinventing Cinema examines film culture at the turn of this century, at the precise moment when digital media are altering our historical relationship with the movies. Spanning multiple disciplines, Chuck Tryon addresses the interaction between production, distribution, and reception of films, television, and other new and emerging media. Through close readings of trade publications, DVD extras, public lectures by new media leaders, movie blogs, and YouTube videos, Tryon navigates the shift to digital cinema and examines how it is altering film and popular culture.

What do we mean by the term "animation" when we are discussing film? Is it a technique? A style? A way of seeing or experiencing "a world" that has little relation to our own lived experience of "the world"? In Animated Worlds, contributors reveal the astonishing variety of "worlds" animation confronts us with. Essays range from close film analyses to phenomenological and cognitive approaches, spectatorship, performance, literary theory, and digital aesthetics. Authors include Vivian Sobchack, Richard Welhe, Thomas Lamarre, Paul Wells, and Karin Wehn.

Lines of Sight—the seventh volume in the Mechademia series, an annual forum devoted to Japanese anime and manga—explores the various ways in which anime, manga, digital media, fan culture, and Japanese art—from scroll paintings to superflat—challenge, undermine, or disregard the concept of Cartesian (or one-point) perspective, the dominant mode of visual culture in the West since the seventeenth century. More than just a visual mode or geometric system, Cartesianism has shaped nearly every aspect of modern rational thought, from mathematics and science to philosophy and history. Framed by Thomas Lamarre’s introduction, “Radical Perspectivalism,” the essays here approach Japanese popular culture as a visual mode that employs non-Cartesian formations, which by extension make possible new configurations of perception and knowledge. Whether by shattering the illusion of visual or narrative seamlessness through the use of multiple layers or irregular layouts, blurring the divide between viewer and creator, providing diverse perspectives within a single work of art, or rejecting dualism, causality, and other hallmarks of Cartesianism, anime and manga offer in their radicalization of perspective the potential for aesthetic and even political transformation. Contributors: David Beynon, Deakin U; Fujimoto Yukari, Meiji U; Yuriko Furuhata, McGill U; Craig Jackson, Ohio Wesleyan U; Reginald Jackson, U of Chicago; Thomas Lamarre, McGill U; Jinying Li; Waiyee Loh; Livia Monnet, U of Montreal; Sharalyn Orbaugh, U of British Columbia; Stefan Riekeles; Atsuko Sakaki, U of Toronto; Miryam Sas, U of California, Berkeley; Timon Screech, U of London; Emily Somers; Marc Steinberg, Concordia U.

Reshapes the history of abstract animation and its importance to computer imagery and cinema. Animation and technology are always changing with one another. From hand-drawn flipbooks to stop-motion and computer-generated imagery (CGI), animation’s identity is in flux. But many of these moving image technologies, like CGI, emerged from the world of animation. Indeed, animation has made essential
contributions to not only computer imagery but also cinema, helping shape them into the fields and media forms we know today. In Pulses of Abstraction, Andrew R. Johnston presents both a revealing history of abstract animation and an investigation into the relationship between animation and cinema. Examining a rich array of techniques—including etching directly onto the filmstrip, immersive colored-light spectacles, rapid montage sequences, and digital programming—Pulses of Abstraction uncovers important epistemological shifts around film and related media. Just as animation's images pulse in projection, so too does its history of indexing technological and epistemic changes through experiments with form, material, and aesthetics. Focusing on a period of rapid media change from the 1950s to the 1970s, this book combines close readings of experimental animations with in-depth technological studies, revealing how animation helped image culture come to terms with the rise of information technologies.

This volume critically analyses and theorises Asian interventions in the expanding phenomenon of Global Shakespeare. It interrogates Shakespeare’s ‘universality’ from Asian perspectives: how this has been modified or even replaced by the ‘global bard’ as a recognisable brand, and how Asian Shakespeares have contributed to or subverted this process by both facilitating the worldwide dissemination of the bard’s plays and challenging and resisting the very templates through which they become globally legible. Critically acclaimed Asian productions have prominently figured at premier Western festivals, and popular Asian appropriations like Bollywood, manga and anime have created new kinds of globally accessible Shakespeare. Essays in this collection engage with the emergent critical issues: the efficacy of definitions of the ‘local’, ‘global’, ‘transnational’ and ‘cosmopolitan’ and of the liminalities and mobilities in between. They further examine the politics of ‘West’ and ‘East’, the evolving markers of the ‘Asian’ and the equation of the ‘glocal’ with the ‘Asian’; they attend to performance and archiving protocols and bring the current debates on translation, appropriation, and world literature to speak to the concerns of global and transnational Shakespeare. These investigations analyse recent innovative Asian theatre productions, popular cinematic and manga appropriations and the increasing presence of Shakespeare in the Asian digital sphere. They provide an Asian standpoint and lens in rereading the processes of cultural globalisation and the mobilisation of Shakespeare.

Film Distribution in the Digital Age critically examines the evolution of the landscape of film distribution in recent years. In doing so, it argues that the interlocking ecosystem(s) of media dissemination must be considered holistically and culturally if we are to truly understand the transnational flows of cultural texts.

This collection charts the terrain of contemporary Japanese animation, one of the most explosive forms of visual culture to emerge at the crossroads of transnational cultural production in the last twenty-five years. The essays offer bold and insightful engagement with animé’s concerns with gender identity, anxieties about body mutation and technological monstrosity, and apocalyptic fantasies of the end of history. The contributors dismantle the distinction between ‘high’ and ‘low’ culture and offer compelling arguments for the value and importance of the study of animé and popular culture as a key link in the translation from the local to the global.

Independent Filmmaking and Digital Convergence: Transmedia and Beyond offers a comprehensive analysis of the technological changes of the past few decades in independent film and media-making, and explores new strategies and practices in media production, exhibition and distribution for independent producers and content creators. The book examines how independent filmmaking concepts have merged with digital and online technologies to create new hybrid multi-platform content creations. It explores key questions like how to reach an audience at a time when media conglomerates and their products dominate the market, and simultaneously, there is an overabundance of content competing for viewer time. The book investigates what kind of stories we tell and why; how the audience has changed, and what their
expectations are; what the various niche markets are for independent producers and creators in new media; and new models for media financing and distribution. The content found in this book: Bridges the gap between professional media-makers and amateurs by focusing on new and emerging media models and practices. Provides a holistic view of the new media landscape, and practical advice on producing content in the new multi-platform media environment. Demonstrates how to create financially sustainable models for independent producers and creators in a shifting and unstable environment, providing many challenges, but also opportunities for independents. The author's website (http://www.filmconvergence.com/) supports this book with case studies, news and updates.

New Vampire Cinema lifts the coffin lid on forty contemporary vampire films, from 1992 to the present day, charting the evolution of a genre that is, rather like its subject, at once exhausted and vibrant, inauthentic and 'original', insubstantial and self-sustaining. Ken Gelder's fascinating study begins by looking at Francis Ford Coppola's Bram Stoker's Dracula and Fran Rubel Kuzui's Buffy the Vampire Slayer - films that seemed for a moment to take vampire cinema in completely opposite directions. New Vampire Cinema then examines what happened afterwards, across a remarkable range of reiterations of the vampire that take it far beyond its original Transylvanian setting: the suburbs of Sweden (Let the Right One In), the forests of North America (the Twilight films), New York City (Nadja, The Addiction), Mexico (Cronos, From Dusk Till Dawn), Japan (Blood: The Last Vampire).

This gorgeously animated film is the brainchild of Hayao Miyazaki, one of Japan's most acclaimed directors, and is Japan's most successful film ever, breaking the attendance records previously set by E.T. This lavishly illustrated volume tells the story behind the making of the film, and reveals the secrets behind anime, the popular Japanese animation technique. Set in the remote forests of northern Japan, The Princess Mononoke is an eco-fable of medieval times in which industry and civilization struggle against nature and humanity. Hailed as one of the best animated features ever made, The Princess Mononoke is certain to enthral audiences across the country.

The Cinema Book is widely recognised as the ultimate guide to cinema. Authoritative and comprehensive, the third edition has been extensively revised, updated and expanded in response to developments in cinema and cinema studies. Lavishly illustrated in colour, this edition features a wealth of exciting new sections and in-depth case studies. Sections address Hollywood and other World cinema histories, key genres in both fiction and non-fiction film, issues such as stars, technology and authorship, and major theoretical approaches to understanding film.

Movie is considered to be an important art form; films entertain, educate, enlighten and inspire audiences. Film is a term that encompasses motion pictures as individual projects, as well as — in metonymy — the field in general. The origin of the name comes from the fact that photographic film (also called filmstock) has historically been the primary medium for recording and displaying motion pictures. Many other terms exist — motion pictures (or just pictures or "picture"), the silver screen, photoplays, the cinema, picture shows, flicks — and commonly movies.

This book explores the range and dynamism of contemporary Asian cinemas, covering East Asia (China, Japan, South Korea, Hong Kong, Taiwan), Southeast Asia (Thailand, Singapore, Malaysia), South Asia (Bollywood), and West Asia (Iran), in order to discover what is common about them and to engender a theory or concept of "Asian Cinema". It goes beyond existing work which provides a field survey of Asian cinema, probing more deeply into the field of Asian Cinema, arguing that Asian Cinema constitutes a separate pedagogical subject, and putting forward an alternative cinematic paradigm. The book covers "styles", including the works of classical Asian Cinema masters, and
specific genres such as horror films, and Bollywood and Anime, two very popular modes of Asian Cinema; "spaces", including artistic use of space and perspective in Chinese cinema, geographic and personal space in Iranian cinema, the private "erotic space" of films from South Korea and Thailand, and the persistence of the family unit in the urban spaces of Asian big cities in many Asian films; and "concepts" such as Pan-Asianism, Orientalism, Nationalism and Third Cinema. The rise of Asian nations on the world stage has been coupled with a growing interest, both inside and outside Asia, of Asian culture, of which film is increasingly an indispensable component - this book provides a rich, insightful overview of what exactly constitutes Asian Cinema.

An authoritative and much-needed overview of the main issues in the field of early cinema from over 30 leading international scholars in the field First collection of its kind to offer in one reference: original theory, new research, and reviews of existing studies in the field Features over 30 original essays from some of the leading scholars in early cinema and Film Studies, including Tom Gunning, Jane Gaines, Richard Abel, Thomas Elsaesser, and André Gaudreault Caters to renewed interest in film studies' historical methods, with strict analysis of multiple and competing sources, providing a critical re-contextualization of films, printed material and technologies Covers a range of topics in early cinema, such as exhibition, promotion, industry, pre-cinema, and film criticism Broaches the latest research on the subject of archival practices, important particularly in the current digital context

The theme of memory has played a significant role in anime throughout its evolution as an art form and as popular entertainment. Anime’s handling of memory is multifaceted, weaving it into diverse symbolic motifs, narratives and aesthetic issues. This study aims to provide a detailed analysis of a range of anime titles wherein different aspects of this cultural phenomenon are articulated. It explores anime films and series that exemplify the distinctive signatures placed by particular directors or studios on the treatment of memory, while also highlighting the prominence of memory in anime with reference to specific philosophical, artistic, and historical contexts.

The Japanese Cinema Book provides a new and comprehensive survey of one of the world’s most fascinating and widely admired filmmaking regions. In terms of its historical coverage, broad thematic approach and the significant international range of its authors, it is the largest
and most wide-ranging publication of its kind to date. Ranging from renowned directors such as Akira Kurosawa to neglected popular genres such as the film musical and encompassing topics such as ecology, spectatorship, home-movies, colonial history and relations with Hollywood and Europe, The Japanese Cinema Book presents a set of new, and often surprising, perspectives on Japanese film. With its plural range of interdisciplinary perspectives based on the expertise of established and emerging scholars and critics, The Japanese Cinema Book provides a groundbreaking picture of the different ways in which Japanese cinema may be understood as a local, regional, national, transnational and global phenomenon. The book's innovative structure combines general surveys of a particular historical topic or critical approach with various micro-level case studies. It argues there is no single fixed Japanese cinema, but instead a fluid and varied field of Japanese filmmaking cultures that continue to exist in a dynamic relationship with other cinemas, media and regions. The Japanese Cinema Book is divided into seven inter-related sections: * Theories and Approaches * Institutions and Industry * Film Style * Genre * Times and Spaces of Representation * Social Contexts * Flows and Interactions

The thought-provoking, aesthetically pleasing animated films of Hayao Miyazaki attract audiences well beyond the director's native Japan. Princess Mononoke and Spirited Away were critically acclaimed upon U.S. release, and the earlier My Neighbor Totoro and Kiki’s Delivery Service have found popularity with Americans on DVD. This critical study of Miyazaki’s work begins with an analysis of the visual conventions of manga, Japanese comic books, and animé; an overview of Japanese animated films; and a consideration of the techniques deployed by both traditional cel and computer animation. This section also details Miyazaki’s early forays into comic books and animation, and his output prior to his founding of Studio Ghibli. Part Two concentrates on the Studio Ghibli era, outlining the company's development and analyzing the director’s productions between 1984 and 2004, including Castle in the Sky, My Neighbor Totoro and his newest film, Howl’s Moving Castle. The second section also discusses other productions involving Studio Ghibli, including Grave of the Fireflies and The Cat Returns. Appendices supply additional information about Studio Ghibli’s merchandise production, Miyazaki’s global fan base, and the output of other Ghibli directors.

An unrivaled visual guide to the cityscapes and buildings of the most celebrated and influential anime movies.

Upon its U.S. release in the mid 1990s Ghost in the Shell, directed by Mamoru Oshii, quickly became one of the most popular Japanese animated films, or anime, in the country. Despite these accolades, Oshii is known as a contrarian within anime, a self-proclaimed ‘stray dog’, avoiding the limelight in favour of his own personal cinematic vision. He cannot be pigeon-holed, working in both live-action film and animation, directing everything from absurdist comedy to thrillers to meditations on the nature of reality. Stray Dog of Anime is the first book to take an in-depth look at Oshii’s major films, from his early days working on Urusei Yatsura to Avalon, his most recent feature. Ruh details Oshii’s evolution as a director, paying special attention to his personal style and symbolism, resulting in a unique guide that will appeal to anime fans and cinestes of all kinds.

A continuation of 1994’s groundbreaking Cartoons, Giannalberto Bendazzi’s Animation: A World History is the largest, deepest, most comprehensive text of its kind, based on the idea that animation is an art form that deserves its own place in scholarship. Bendazzi delves beyond just Disney, offering readers glimpses into the animation of Russia, Africa, Latin America, and other often-neglected areas and introducing over fifty previously undiscovered artists. Full of first-hand, never before investigated, and elsewhere unavailable information, Animation: A World History encompasses the history of animation production on every continent over the span of three centuries. Volume II delves into the decades following the Golden Age, an uncertain time when television series were overshadowing feature films, art was heavily
influenced by the Cold War, and new technologies began to emerge that threatened the traditional methods of animation. Take part in the turmoil of the 1950s through 90s as American animation began to lose its momentum and the advent of television created a global interest in the art form. With a wealth of new research, hundreds of photographs and film stills, and an easy-to-navigate organization, this book is essential reading for all serious students of animation history. Key Features Over 200 high quality head shots and film stills to add visual reference to your research Detailed information on hundreds of never-before researched animators and films Coverage of animation from more than 90 countries and every major region of the world Chronological and geographical organization for quick access to the information you’re looking for

You are girlish, our images tell us. You are plastic. Girlhood and the Plastic Image explains how, revealing the increasing girlishness of contemporary media. The figure of the girl has long been prized for its mutability, for the assumed instability and flexibility of the not-yet-woman. The plasticity of girlish identity has met its match in the plastic world of digital art and cinema. A richly satisfying interdisciplinary study showing girlish transformation to be a widespread condition of mediation, Girlhood and the Plastic Image explores how and why our images promise us the adaptability of youth. This original and engaging study will appeal to a broad interdisciplinary audience including scholars of media studies, film studies, art history, and women's studies.

Street urchins Black and White have skyscraper-sized chips on their shoulders, but are fiercely loyal to each and quick to avenge any slight. The town and police are afraid of them. Then Rat, the crime boss, returns from prison.

In Japonisme and the Birth of Cinema, Daisuke Miyao explores the influence of Japanese art on the development of early cinematic visual style, particularly the actualité films made by the Lumière brothers between 1895 and 1905. Examining nearly 1,500 Lumière films, Miyao contends that more than being documents of everyday life, they provided a medium for experimenting with aesthetic and cinematic styles imported from Japan. Miyao further analyzes the Lumière films produced in Japan as a negotiation between French Orientalism and Japanese aesthetics. The Lumière films, Miyao shows, are best understood within a media ecology of photography, painting, and cinema, all indebted to the compositional principles of Japonisme and the new ideas of kinetic realism it inspired. The Lumière brothers and their cinematographers shared the contemporaneous obsession among Impressionist and Post-Impressionist artists about how to instantly and physically capture the movements of living things in the world. Their engagement with Japonisme, he concludes, constituted a rich and productive two-way conversation between East and West.

This book provides a sustained engagement with contemporary Indian feature films from outside the mainstream, including Aaranaya Kaandam, I.D., Kaul, Chauthi Koot, Cosmic Sex, and Gaali Beeja, to undercut the dominance of Bollywood focused film studies. Gopalan
assembles films from Bangalore, Chennai, Delhi, Kolkata, and Trivandrum, in addition to independent productions in Bombay cinema, as a
way of privileging understudied works that deserve critical attention. The book uses close readings of films and a deep investigation of film
style to draw attention to the advent of digital technologies while remaining fully cognizant of ‘the digital’ as a cryptic formulation for
considering the sea change in the global circulation of film and finance. This dual focus on both the techno-material conditions of Indian
cinema and the film narrative offers a fulsome picture of changing narratives and shifting genres and styles.

Director Satoshi Kon blazed a brilliant animation career before his tragic death in 2010 at age 46. Now Dark Horse is privileged to remember
him and his works through The Art of Satoshi Kon, a beautiful book of Kon’s illustrations for his movies Perfect Blue, Tokyo Godfathers,
Millennium Actress, Paprika and his television series Paranoia Agent, plus his unfinished The Dreaming Machine, his manga, commercial art,
and several little-known and incomplete projects by the creator! Includes a special message from Academy Award nominated director Darren
Aronofsky (The Wrestler, Black Swan, Noah)

This volume collects contributions written by eight authors interested in different research areas in East Asian Studies. Divided into a
Japanese and a Chinese section, it explores topics ranging from East Asian literatures to contact linguistics and sociology. The Japanese
section contains four essays about contemporary Japanese cinema and different aspects of Japanese modern and contemporary literature (i.e.
the literary motif of kame naku, ‘crying turtle’, yuri manga, and tenkō bungaku, the ‘literature of conversion’). The Chinese section concerns
two main macro-topics: on the one hand, it focuses on issues related to cultural contacts between Italy and China; on the other hand, it deals
with Chinese migration to Italy, highlighting socio-historical aspects and cultural production.

This book explores the rich complexity of Japan’s film history by tracing how cinema has been continually reshaped through its dynamic
engagement within a shifting media ecology. Focusing on techniques that draw attention to the interval between frames on the filmstrip,
something that is generally obscured in narrative film, Lee uncovers a chief mechanism by which, from its earliest period, the medium has
capitalized on its materiality to instantiate its contemporaneity. In doing so, cinema has bound itself tightly with adjacent visual forms such
as anime and manga to redefine itself across its history of interaction with new media, including television, video, and digital formats.
Japanese Cinema Between Frames is a bold examination of Japanese film aesthetics that reframes the nation’s cinema history, illuminating
processes that have both contributed to the unique texture of Japanese films and yoked the nation’s cinema to the global sphere of film
history.
